NETWORK

Flexible Academic Careers

// Share ideas & experiences with each other

**The dialogue platform for employee sharing
and knowledge transfer**

Universities, companies and public institutions compete for qualified specialists. We, the Frankfurt University of Applied Sciences, would like to work with regional employers for sustainable personnel recruitment and the intensive exchange of research innovations.

We want to connect with you so that:

- you can find out about free collaborative positions at the Frankfurt UAS
- you can fill these positions together with us in your company
- you can share your experiences on contract design and the implementation of the collaborative positions with other employers
- together we can find an answer to the shortage of skilled workers

Our collaborative programs:

Collaborative
doctoral
program

Collaborative
postdoc
program

Collaborative
professorship

All three career formats are dual-oriented and anchored 50 percent each at our university and at a practice partner.

Added value | Our network offers you the opportunity:

- to promote and retain your employees
- to attract new junior staff
- to solve research questions and apply current results in a targeted manner
- to expand your circle of contacts
- to obtain financial support
