Get ready for a university career

New career formats to qualify for a professorship at the Frankfurt University of Applied Sciences

A professorship at our university is rewarding: our academic staff are free to shape their own research and teaching, contribute to the transfer of knowledge in society, influence students' educational paths and balance their careers with family and care responsibilities.

However, in order to take up a UAS professorship, young scientists must meet certain requirements. With our innovative qualification and collaborative programs, we prepare them for a career at our university.

Requirements for a UAS professorship

- doctorate
- at least five years of professional experience (three of them outside the university)
- first teaching experience

Qualification and collaborative programs

Employment at the Frankfurt UAS and at a practical partner, each at **50 per cent**.

Collaborative doctoral program Acquiring professional and research experience

- **Doctoral thesis:** at Frankfurt UAS in research-intensive areas or at one of our doctoral centres
- Limited to **three years**

Collaborative postdoc Gaining teaching experience, expanding practical knowledge

- **Teaching load:** Four hours per week per semester
- Limited to **three years**

Collaborative professorship Teaching, researching and working

- **Teaching load:** Nine hours per week per semester = 50 per cent of the usual teaching workload of a UAS professorship
- Limited to **three years**
