Emerging Issues in Prison Health

- Investigates the impact of prison and prisoner culture on well-being of prisoners (e.g. forced sex and hierarchy), women's, migrant and ethnic minorities' health
- Describes holistically at the prison settings as an institution in the context of health promotion approach (developed by the World Health Organisation) in the context of public health
- Brings together research and practice to improve health policy and practice within the prison environment using evidence based approaches

This volume recognizes and addresses the health care issues of prisoners, to establish best practices and to learn about approaches to these challenges from around the world. It presents new evidence on several emerging and classical prison health issues. The first goal of this volume is to address emerging issues related to health in prison. Second, it presents the most recent research-based evidence and translates it to the practice. Thirdly, it allows for sufficient diversity while also incorporating updates of some important already recognized prison health.

The volume discusses prisons and the life and well-being of prisoners and staff, after growing problems as drug misuse (incl. tobacco smoking), infectious diseases (HIV/AIDS, hepatitis, STIs and TB), psychiatric problems, inadequate and unhealthy living conditions (incl. nutrition), overcrowding of prisons. These are addressed adequately in order to meet the international requirements of equivalence of health care.
